### Description

The **SF-1500 & SF-2000 series** offer excellent performance to price ration, for a wide range of industrial applications.

Front panel digital display allows for selection of: OVP, UVP, OTP, OLP, VAC, AMP, WATT, VDC, TEMP, Hz

Suitable for powering all types of electronic loads and products, such as laptops, vacuum cleaners, fans, fluorescent, incandescent lights, shavers, coffee makers, toasters, video games, etc.

And the 3 minute maximum output power, allows for efficient and correct start up of motors and fans.

With a range of protection features such as "Auto shutdown" that prevents total battery discharge, and the extremely low input current draw when output is not powering equipment, ensures maximum battery capacity at all times.

Output voltage is user selectable 220/230/240V RMS ± 3%, allowing for the best setting for customer equipment.

Output voltage is **floating** and factory set: 230/240V RMS ± 3%.
